TERMS OF TRADE

PAYMENT TERMS
All Major Credit Cards are accepted. Net 30 day terms are available, based on credit approval.

SHIPPING
Shipments are FOB Antioch, IL. Unless a specific shipping company is designated by the customer, Happy Hour will ship the fastest and least expensive method possible. If we prepay the freight, our cost will be added to the invoice. All case packs are UPS or FedEx approved carton sizes. Happy Hour will combine small case packs into larger boxes to save on shipping.

MINIMUM ORDER
There is a $150 initial order minimum for Happy Hour. There is no minimum on ensuing orders, only that full case packs are purchased.

NEW ACCOUNTS
To establish credit, please send 3 current trade references and a bank reference along with your billing and shipping addresses. Please include your Federal ID number (EIN) or reseller number. Or ask us to supply a Happy Hour Credit Application form.

WARRANTY
All Happy Hour, Inc. products are warranted from manufacturer’s defects for one year from the date of purchase. Contact Happy Hour for any defective claim. To improve quality and value, we may occasionally make enhancements or modifications to our products. As a result, features or pictures in this catalog may have minor differences from the products we ship. Prices are subject to change without notice.

ON-LINE ORDERING
Register to set up an account on our web site to see pricing and availability of our items. Registration will also allow for on-line orders to be placed and expedited through our order system.

TARIFF IMPACT
As everyone is well aware, many China sourced products are subject to 10% additional duty effective in September 2018. On January 1, 2019 these tariffs may increase to 25%. At the time of printing this catalog, Happy Hour has worked hard to maintain our current prices. However, it is quite possible that at some point we will need to have a price increase on the impacted items.

Happy Hour is striving to minimize the impact to our customers as much as possible. We are looking at alternative manufacturing locations and are evaluating other options that would minimize any future increases. We will continue to closely monitor tariffs as things change and will adjust as a company accordingly. Thank you for your business and continued support.

Private Preserve is a simple way to slow the natural aging process and keep wines fresher longer. Air flows into a bottle when you pop the cork. Simply reinserting the cork will prevent a continuous flow of oxygen from entering the bottle and thus slow the oxidation of the contents. But the oxygen already inside will be enough to age the contents unless you spray in some Private Preserve.
